Upper management's direction to include L-7 testing in mini-DAAC

28. Description of Change: (use additional Sheets if necessary)
As of 10/28/98, with the (apparent) increased robustness of the 4px.10 (alias jade) software and the fact that scenarios 1, 4, and 5 are running reasonably well in mini-DAAC, our direction from management is to now incorporate L-7 data into Scenario 1 and to add tape acquires of L-7 data to Scenario 5. Management wanted Ingest of L-7 data to start right away. However, we need to get started in preparations as quickly as possible.

29. Proposed Solution: (use additional sheets if necessary)
EDS Bruce Clark/Sarah Lawellen will identify SUN sparc machine and also disk Pack 100 GB (50 GB minimum). Also, we need to install DCE client, motif libraries and Roguewave COTS on this machine.
Configuration: Sun sparc 20/50 with 128 mB RAM } *Provided by Bruce*
2 - 6x9 GB multi pack
